50X1-HUN

i. Workshop guards

Eight Communists accompanied by watchdors patrol the workshops by night.

- 3. Installations in the tube workshops are as follows:
 - a. 3 Brickner automatic welding machines
 - b. I special machine for Mattless parts (sic)
 - c. 2 special circuit breakers
 - d. 6 reduction furnaces
 - . 2 automatic presses
 - f. 4 crusting (sintering) machines
 - g. 7 semi-automatic machines for fitting tube bases
 - h. 4 tube meter tables
 - i. 10 tube testing stands
 - j. Spot welders for tube assembly
 - k. 4 high frequency vacuum pumps, 2 reduction furnaces and 2 special electric furnaces used in the special tube section
 - 1. 12 rachines for the manufacture of cathodes
 - m. 6 machines for the manufacture of grids
 - n. 4 conveyors and 2 inspection boxes for the mass production of receivers
 - o. 2 compressors for air liquefying (sic)
- 4. Installations in the tool room and the section for the manufacture of metal radio parts are as follows:
 - a. 8 perforating lathes
 - b. 4 grinding machines
 - c. 4 milling machines
 - d. 8 presses
 - e. 10 semi-automatic machines
 - f. 4 automatic machines
 - g. hardening furnaces
- Plans under the Five Year Plan call for the enlarging of the Mloubetin plant and the transferring of the tube department to Roznov-Radhost. About 40 percent of production at present is for domestic consumption while the remainder is exported to the USCR and the Soviet satellites. The plant is under the supervision of the Ministry of Defense (MMO).
